

An Oxford Style Debate Concerning the Unauthorized Disclosure of Classified Government Information via the Internet

“The unauthorized disclosure of classified government information via the internet fosters free speech and an informed public which are essential to the democratic process.”

Dr. Ginny Whitehouse, Department of Communication

“There are technical solutions available through cryptology for regulating the unauthorized disclosure of classified government information via the internet.”

Dr. Pat Costello, Department of Mathematics and Statistics

“The unauthorized disclosure of classified government information via the internet poses a threat to national security.”

Dr. Mike Collier, Department of Safety, Security and Emergency Management

Monday, March 26, 2012
7:30-9:00pm
